Women & Money: Power Savings Success Map

1. Write the total amount you want to save on the top line in Milestones column. This is your target. Make this at least 20% higher than you want so you have a stretch opportunity!
2. Next, fill in each milestone number in the Milestones column in increments of your choice, moving towards your target amount as you move up the chart. *(Reminder: Choose milestone amounts that you can meet frequently and still stretch you to reach the target quickly.)*
3. Each month, color in that month's column (from the bottom up) the amount you've earned. *(Example: If this month you earned half a milestone amount, color in half of the box for the month.)*
4. Remember to Celebrate and acknowledge your progress!

Example:

Milestones	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6	Month 7	Month 8	Month 9	Month 10	Month 11	Month 12
\$13,000!
